## Subject: New generation of EMC PARTNER equipment

Distinguished customers and representatives,

EMC PARTNER is proud to announce that its already successful product lines based on touch screen control have been recently upgraded.

**The new products retain all essential characteristics of previous lines** and offer additionally seamless performance: latest generation of capacitive touch screen, Quad Core 1.2 GHz processor, Gigabit LAN, etc.

However, in order to distinguish between generations, slightly different product names will be introduced, as described in the table below.

Previous version	Version introduced in 2020
IMU4000	IMU-MGS
IMU3000	IMU-MGE
DOW3000	DOW-CG1
AVI3000	AVI-LV3
MIL3000	MIL-MG3

New exciting features supported additionally by the platform will be announced in the next months.

Upgrades and firmware updates for the previous platform will remain available.

For additional questions and clarifications, please do not hesitate to contact us or our local representative.

Best regards,
